Outlook 8K Wireless Optical Mouse

User’s Guide

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITIONS: (1) TH DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDIN INTERFERENCE THAT MAY CAUSE UNDESIRED OPERATION.

Federal Communications Commission Requirements

The equipment has been tested and found to comply with the limits for Class B Digital Device, pursuant to part 15 of the FCC Rules. These limits a designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate rad frequency energy and, if not installed and used in accordance with the instruction, may cause harmful interference to radio communication. However, the is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television receptio which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the followi measures:

- Reorient of relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

THE CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER AUTHORITY TO OPERATE THE EQUIPMENT.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

INTRODUCTION

CONGRATULATIONS ON YOUR PURCHASE! YOUR NEW RF-MOUSE OUTLOOK 8K IS EASY TO INSTALL AND OFFERS YOU A COUNTLESS OF USEFUL FEATURES. THE RADIO RECEIVER CAN BE CONVENIENTLY PLACED ANYWHERE TO GIVE YOU THE FREEDOM YOU NEED WHILE WORKING.

Connecting the RF-Mouse Receiver

The RF-Mouse receiver connects to your computer in the same way as a conventional mouse does; allowing you to place the receiver wherever convenient to your desktop.

1. Locate an available USB mouse port on the back of your computer.

2. Insert the USB mouse port connector into the available computer USB port.

If you want to connect a USB mouse to your computer PS2 port, you must use a USB to PS2 adapter.

Locating the RF-Mouse Receiver

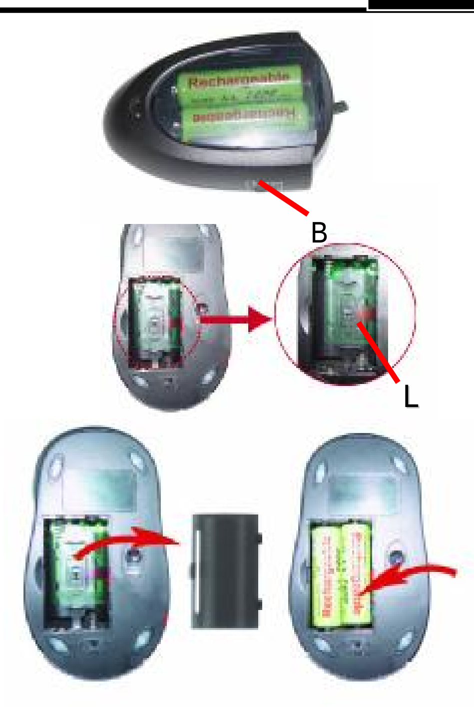

Your RF-Mouse has limitations on the range or distance from its receiver. To make sure that your mouse sends and receives properly, refer to the following instructions:

1. For optimal performance, place the receiver at least 8 inches (20 centimeters) away from other electrical devices, such as the computer, the monitor, or external storage drives.
2. The RF-Mouse should be no farther than 3.3 feet (1.0 meter) from the mouse receiver. This will ensure optimal communication between the mouse and receiver.
3. If you are working on a metallic surface, try a mouse pad for better reception.
   Switch frequency channels to prevent interference from other RF pointing devices.
   (See the following section for more information.)

Selecting the Frequency Channel

The RF-Mouse operates on two frequency channels. To prevent interference when using two RF Mice in close proximity, a different frequency channel should be used for each mouse. Refer to the following instructions to change the frequency channel for your mouse:

1. Set the frequency channel (B) on the receiver to 1 or 2.
2. Remove the battery cover from the mouse (see the following Inserting the Batteries section).
3. Set the frequency channel (L) on the mouse to 1 or 2. (The frequency channel for mouse and receiver must be the same).

Inserting the Batteries

The RF-Mouse requires two batteries. Refer to the following to insert the batteries:

1. Press the tab on the bottom of the mouse cover as shown here and remove the cover.
2. Insert the two batteries. (The correct polarity is indicated on the battery compartment casing.)
3. Replace the cover.

Dual receiver/charger function

The receiver can work as a charger which you can put the spare rechargeable batteries on the charging compartment. The LED (K) light shows you that the mouse is working properly. The LED (M) is the charging LED. The bright charging red light shows you that the batteries are low. The light turns to dim as the batteries are charged for some time. When the light turns off, it implies the battery power is fully charged.

*. ***<u>DON´T CHARGE NON-RECHARGEABLE BATTERY TO THIS RECEIVER.</u>***

About the indicating light (LED) on receiver

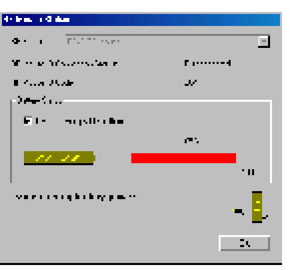

1. When using the mouse, the left working light(K) is blinking and in Green.
2. If the rechargeable batteries are charged, the right LED(M) is in red. The bright red light(M) shows you that batteries are low.
3. The light(M) turns to dim as the batteries are charged for some time. When the light(M) turns off, it implies the battery power is fully charged.

Installing the iOutlookWorks Software

If there're other mouse drivers installed on your computer, please have them uninstalled before you start the installation process. Also please be sure you have completed above hardware setup.

Windows 95/98/ME/2000/XP/NT4.0 installation (Note: the USB Device does not support Windows 95/NT4.0)

1. Insert the installation CD into your CD drive.
2. The "auto run" program will show you the installation screen.
3. Click on the "iOutlookWorks" to start the installation.
4. Follow the instructions on your screen to complete the installation

Checking the Batteries power

To check the battery power, right-click the mouse icon in the Taskbar. Choose the "Check RF-Mouse Status" option to display the RF-Mouse Status window. The current battery remain power percentage is shown.

Power ON/OFF switch

A power ON/OFF switch (N) is located on the bottom side as shown. You may turn off the power when it's not in use.

It saves battery power and prolongs battery life, especially convenient for traveling.

The RF-Mouse ID code

Each RF-Mouse is assigned a unique ID code at manufacturing, so the receiver only picks up the signal from your mouse and prevents other RF-Mouse radio signals from operating on your computer. This feature can also be prohabited, allowing other RF-pointing devices to operate your computer.

Connecting the RF-Mouse ID Code

When the driver installation is finished your reboot computer and the RF-Mouse window (shown on the right) appeared. Before setting up the RF-Mouse ID connection, please make sure there are no other RF pointing devices around or in use.
CONNECT ID: Move the RF-Mouse for a few seconds to establish a connection, and then click Connect ID. The unique ID code of your mouse is recognized. Once this process properly executed, other RF pointing devices will not function on your computer.
Exit: Click Exit to complete the ID setup.

Changing the RF-Mouse ID Code

You can use a new RF-Mouse on your computer without changing the Radio receiver; you only need to change the ID code. Refer to the following:

1. Press [Shift + Alt + F11] or [Shift + Alt + F12] to call up the RF-Mouse ID Code window.
2. Move the RF-Mouse for a few seconds to establish a connection, and then click Connect ID.
3. The new ID code is connected and the RF-Mouse window closed.

Click Exit to close the RF-Mouse ID code window.

Why use iOutlookWorks

There are a total of 8 buttons on the Office 8K mouse. The 3rd Wheel button, the 4th and the 5th buttons are programmable with 54 shortcuts to make your daily repetitive works easier. Not only that, users will love the Outlook 8K RF-mouse and its iOutlookWorks program features. What makes this mouse different and unique from all other mice is its 6th, 7th and 8th buttons, which work as the Office commands set.
